1637 Mk II – How to Clear the Internal Sample Log

This technical note describes the process to clear the internal sample log on the Novatech Controls 1637 Mk-II Oxygen & Carbon Dioxide Food Packaging Analyser using the menu system.

1. **Enable *Extended Display Mode***
   From the main screen, **press hand hold the *UP△* button for approximately 5 seconds**.

   In *Extended Display Mode* the writing on the display will look similar to that in the picture to the right ->

   Release the *UP△* button.

2. **Enter the Configuration Menu**
   From the *Extended Display Mode* screen, **press and hold the *ENTER* button for approximately 3 seconds**.

   After 3 seconds you will hear a beep and the display will show the words *Entering Configuration Menu*.

   Release the *ENTER* button

3. **Navigate to the Products & Log Menu**
   Press the *DOWN* button twice until the number next to the small cursor shows '11'.

4. **Select the 'Reset Internal Log' Item**
   Press *ENTER* to move the cursor next to the menu item labelled 'Reset Internal Log'

5. **Reset the Internal Log**
   Press *ENTER* to clear the sample log. The display will briefly show the words *Log Cleared*.

   To exit the menu system press the *LOG* button twice.

   To exit *Extended Display Mode* press and hold the *UP△* button for approximately 5 seconds.
